## EDUCATION

<b>MSc in Artificial Intelligence, Systems, Data (IASD) <sup>(a)</sup></b> Paris-Dauphine – PSL University <i>Subjects: Machine Learning, Deep Learning, Optimization, Image Analysis.</i>	2019 – 2020 Paris, France
<b>MSc in Executive Engineering <sup>(b)</sup>   Minor: Data Science</b>  <i>Subjects: Software Engineering, Databases, Probability, Statistics, Operations Research.</i>	2017 – 2020 Paris, France
<b>Mechatronics Engineer (5-year degree) <sup>(c)</sup></b> University of São Paulo (USP) <i>Obtained a 1-year scholarship for an international exchange at the University of Valenciennes (France). Teaching assistant (6 mos.): conducted workshops on numerical analysis using MATLAB.</i>	2013 – 2020 São Carlos, Brazil

## WORK EXPERIENCE

<b>Research Intern (6 mos.) / Research Engineer (since Mar. 2021) <sup>(d)</sup></b>  <i>Working on 2D/3D X-ray tomography segmentation with U-Nets [unet, unet3d]. Talked at a seminar at , the , and the week-course .</i>	since Sep. 2020 (6 mos.) Évry (Parisian region), France
<b>Research &amp; Development Intern <sup>(e)</sup></b> Mindsay <i>Evaluated explainability methods [lime, anchors, shap] on layperson-maintained NLP models (classification task).</i>	2020 (5 mos.) Paris, France
<b>Data Scientist Intern <sup>(f)</sup></b> Datadog <i>Analyzed and developed algorithms for time series, tag analysis, and a knowledge graph.</i>	2019 (7 mos.) New York, USA
<b>Software Engineer Intern <sup>(g)</sup></b> Kelda Drilling Controls <i>Modeled and designed a time series annotation tool for supervised machine learning.</i>	2018 – 2019 (8 mos.) Porsgrunn, Norway
<b>Back-end Developer/Data Scientist Intern</b> Stone Co.	2017 – 2018 (3 mos./2 mos.) Rio de Janeiro, Brazil

## PROJECTS

**tomo2seg <sup>(d)</sup>** Tomography segmentation with deep learning (since Sep. 2020) [tomotoseg].  
**pymdr <sup>(a)</sup>** Implementation of liuMiningDataRecords2003 [liuMiningDataRecords2003] in Python (1 mo.) [pymdr].  
**Sunlight simulator <sup>(b)</sup>** Head of the project; developed a 3D motion simulator in Python (9 mos.) [sunlight].  
**Smart coffee machine <sup>(c)</sup>** Developed a web server in .NET (C#) and an Arduino controller (C++) (4 mos.) [smartCoffee].

## SKILLS & PERSONAL INTERESTS

---

**English (C1):** fluent, worked in English speaking companies for 1 year, obtained TOEFL 117/120 (2020).

**French (C2):** fluent, read subjects in French for 3 years, worked in French organizations for 1 year.

**Portuguese:** native.

**Programming:**

**Python (d-g)** (NumPy, SciPy, Matplotlib, Pandas), MATLAB (c), Java (b), JavaScript (React, Redux) (g).

**Databases** MongoDB (g), InfluxDB (g), PostgreSQL (b).

**Deep learning** TensorFlow (d), Keras (d).

**Prototyping** Streamlit (e), Jupyter Lab (d-e), Jupyter Notebook (f-g).

**Others** ImageJ (d), Avizo (d), GitLab (f), Git (f-g), Bash (f-g), Docker (g).

**Writing and content creation:** Google Suite, LaTeX, Markdown.

**Personal interests:** skydiving, podcasts (especially about politics), has been in 18 countries.
